Aberdeen South Harbour
Mob-De-Mob Project Support

CHALLENGE

The client had an immediate requirement for additional HSEQ resource to support a project they had won.

The project was to manage the HSE requirements of 2 vessels being mobilised over a 2 week period. 24 hours a day, 7 days a week support was needed to manage a busy quayside, involving numerous contractors and simultaneous operations.

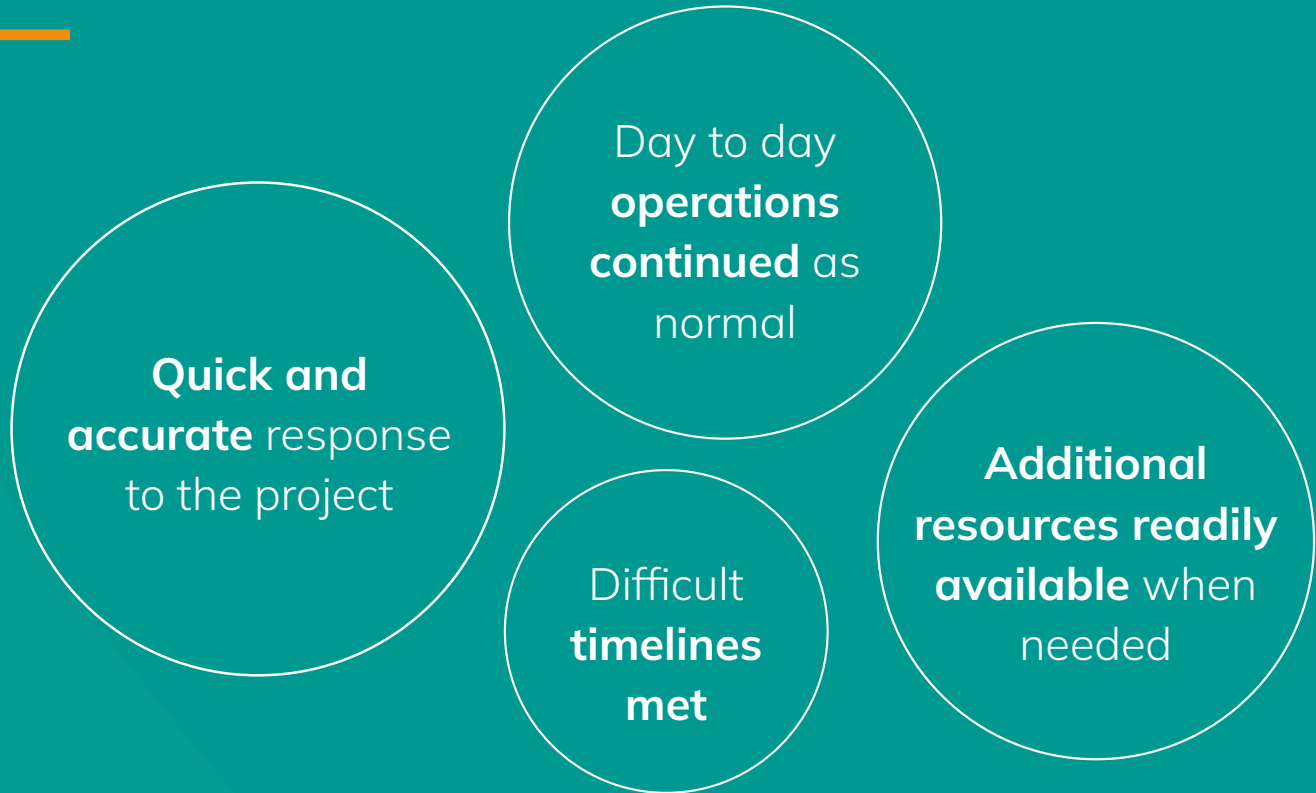

SOLUTION

01. Quensh worked closely and in cooperation with the clients HSEQ Department to provide a team of experienced and competent HSEQ resources to manage the HSE requirements quayside for the duration of the project.
02. Quensh were able to fully support the project by providing 24 hour, 7 days a week on site support during which time the following services were provided:
 - Safety tours
 - Site inductions, including where relevant L2 HIRA's
 - Safety briefings and participation in daily meetings with operational personnel
 - Participation in the management of change (MOC) process
 - Management and participation of the safety observation card system
 - Operational HSE support
 - Sub-contractor management from a HSE perspective
03. Quensh provided a team of specialists with a range of HSEQ skills that ensured successful delivery over the agreed time scales.

JAMES FISHER SUBTECH

RESULTS & BENEFITS

01. Quensh were able to respond and react quickly to ensure competent HSEQ personnel were made available for this project.
02. The project was successfully delivered within the timescales allocated with no issues or safety breaches.
03. This in turn allowed the client and core HSEQ personnel to focus on their day to day HSEQ operations.
04. Quensh were able to provide additional resources when the project was extended by a few days.
05. Ultimately this approach provided cost savings to the client without the need to additional personnel. They were able to outsource experienced HSEQ resources accordingly.
