

COURSE OUTLINE

IOSH WORKING SAFELY

WHO SHOULD ATTEND?

This one-day course is designed for people at any level, in any industry/sector, that require an understanding of the essential elements of health and safety, with a focus on best practice rather than legislation. Ideal for introducing staff to why health and safety is important and demonstrating how everyone can make a difference to their own wellbeing and that of others through everyday behavior.

LEARNING OUTCOMES

Individuals will have an understanding of their responsibilities by covering the following modules of the course.

- Introducing Working Safely
- Identifying Common Hazards
- Protecting our Environment
- Defining Hazard and Risk
- Improving Safety Performance

BENEFITS

- Understand the consequences of the failing to follow health and safety requirements.
- Recognise the importance of integrating health and safety within other business requirements to minimise overall risk.
- Be able to take into account health and safety aspects when completing work activities.
- Giving individuals the health and safety tools and knowledge they need to comply with their legal responsibilities.
- Nationally recognised, certified training. Flexible in delivery – can be built around organisation's requirements and timeframes.

ASSESSMENT PROCESS

- Multiple-choice closed book assessment.
- Multiple Choice closed book hazard spotting exercise.
- Individual must complete both and achieve a minimum 62% in both parts.
- Certificate issued upon successful completion.
